To Whom It May Concern:

Throughout my life I've been a student of knowledge, seeking wisdom and truth. My efforts have made me a Doctor of Natural Science, as well as a Doctor of Divinity. The Eastern Mystic, Bhagwan Shree Rajneesh, now residing in the state of Oregon, has, to me, the foremost mind on this planet. He has written over 350 books of which I've personally read over 50. I can't speak highly enough of his abilities and clearness of insight, this man is obviously a genius and most likely the New Age Buddha.

We, as a country and as members of this society should be honored to have a person of this consciousness among us.

All great thinkers and personages throughout history have been opposed by those who don't yet understand the clarity of their visions, only to find out in retrospect that the messages these great men were offering were the guidelines for future society.

For us, as a nation, to overlook this opportunity to welcome this magnificent mind and not grant him a permanent visa would be an error we would regret forever.

Far too few great minds are developed  
on this planet for us to ignore and/or  
misunderstand one in our midst.

Sincerely,

Dr. Warren J. Stagg,  
N.D. D.D. Ph.D.
