

Kalmthout, 18 July 83

Dear Sirs,

This letter is to bring your attention to the very exceptional personality of Bhagwan Shree Rajneesh.

We are:

- Swami Anand Joost (Sir Joost Vanhecke), Eikelstraat 31, 2180 Kalmthout, Belgium
Graduate from the Namur Jesuits University (Belgium)
Graduate from the Louvain Catholic University (Belgium)
Master in Philosophy and Lettres, specialized in roman languages
University thesis on "Absence and presence in the poetry of J. Torres Bodet" (Torres Bodet was the successor of Huxley as the UNESCO director, was a high official in the government of Mexico and ambassador in Paris. Sir J. Vanhecke was a personal friend of his.)
Professor of French in the State High School of Antwerp (Belgium)
- Ma Anand Marga (Mrs. Simonne Blanche), same address
Graduate from the Catholic University in Louvain
Master in Sciences, specialized in botanic
University thesis on the T-RNA methylation
Collaborated with the professor Gilles in the department of genetics in Louvain
We have been married since 15 years and have 4 children.
We came in contact with Bhagwan's teachings through a friend, and stayed for 3 months in his Ashram in Poona (India).

We first have to face the fact that Bhagwan Shree Rajneesh is famous all over the world and that almost all the newspapers and TV stations from the affluent countries have at least once talked about him. His books are translated in more and more different languages, and in Belgium a university thesis has been written about him in the Antwerp State University at the sociology department.

And secondly, we have to agree with the fact that Bhagwan Shree Rajneesh has superior vision in the world of art and sciences, and a transcendent view of mankind which is for us a huge step forward in the evolution of man. This means:

Some people have already said that the XXI century will be metaphysical or will not be (like André Malraux, high official in de Gaulle government in France, writer and Prix Goncourt). Teilhard de Chardin (paleontologist) in the 1950's convinced the catholic world that the biologic evolution of the planet reached the point of self-evolution.

Now the time has come, where the world moved to a planetary consciousness in all dimensions and where the material power of destruction and the psychic power of supra-human have to overcome a limitation: the XXIst century will be metaphysical or will not be. It means the only physical forces will have to become conscious of their metaphysical energy to let the evolution continue or, it is the end of the planet.

And this is where Bhagwan Shree Rajneesh comes in.

He creates in people's minds a radical change in consciousness, particularly on those who think about the future of the world and who, in all fields, work to prepare the world for the 21st century.

The meditation he teaches, is the means by which the individual can transform his basic physical energy into super-consciousness. The ego and its effects disappear to transform itself in universal consciousness. (Radio France organizes an international meeting in Cordoue about this theory, 2 years ago. The meeting reports are edited in Paris by Stock editions. The same vision has been shared

EXHIBIT "A-703"

by e.a. Fr. Capra, Nobel price of Physics.)

But Bhagwan Shree Rajneesh has more over this unique element: the spiritual energy of this extraordinary man is able to create a new divine Jerusalem: Rajneeshpuram in Oregon State. There, men and women, young and old, from all over the world, irregardless of race nor class, under his spiritual guidance and nourished by his religious teaching learn how to create the new man in his absolute individual freedom.

Dear Sirs,

Please accept our respect.

John L. S.
