

To Whom It May Concern,

Being with Bhagwan Shree Rajneesh has had a dramatic influence on my life and on my work as a therapist. Since I met Bhagwan I have found my ability to work with people and penetrate their problems greatly increased. I have received much benefit through His lectures, meditations, books and from His presence.

I have travelled all over the world and been with many teachers both sectarian and religious. I have a B.A. in Psychology from the State University of New York in 1973-74 I was with Ken Keyes, author of the Handbook to Higher Consciousness and served on the staff of his institute in Berkeley, California.

Of all the teachers I have been with over the year no one surpasses Bhagwan in wisdom and understanding of the human mind and has His ability to transmit this wisdom. I find continual inspiration from my being with Bhagwan and would like to simply share this wisdom and understanding.

His being here is a great opportunity for growth and expansion. I see it in myself and in people I work with.

Sincerely,
