

Thokke, 18 July 1983

Sir,

I'm a 43 year old woman with husband and children and I just heard that my Master Bhagwan Shree Rajneesh has difficulties to stay in your country. I heard about Bhagwan Shree Rajneesh in '79 and began reading His books. What He said touched my very being and for the first time I felt this was what I was looking for all my life.

In my family there were many difficulties at that time and we were not happy at all. I became a disciple in September's in Poona, India and since then my whole world changed in a beautiful way, also for my family. I feel grateful to have a living Master which learned me to love people and to be loved by people. From an ordinary housekeeping woman I became interested in studying, making poems, being creative. And I can say now that at 40 my life has started again.

I always heard that the U.S.A. were for freedom of humanity and religion;

with all my heart I hope that Bhagwan  
Shree Rajneesh may stay in your beautiful  
country and that we have the opportunity  
to visit him as often as we want to.  
What the whole world could know this  
quietness and happiness which my  
Master brought to me and maybe  
peace again will come over the world.

Yours sincerely,
