Dear Sci,

I was very astonished to hear that Baghwan can't stay in the U.S.A. I am a teacher in ethics and since over a year I became a sannyasin of Baghwan. His people are extraordinary people because of his teaching. He teaches people how to be happy, how to be more active, lively and involved with the real problems of life.

As I have been a teacher for 20 years I see how young people are struggling with all kind of emotional problems and are not so happy in their personal lives. The teaching of Baghwan could help them a lot and many young people from all over the world are attracted by his ideas and methods. We myself had a lot of help by following some of his groups and reading his books.

He is a very extraordinary person giving a lot of happiness to more than 250,000 people all over the world which means that his methods are universal and suiting all human beings being of no importance which race, culture, religion they belong to. The most important thing about him is that he doesn't oppose anything to anybody but that he is only interested in people coming to him out of their own free will.

He is a person of the same value as Christ. Buddha and so many other thinkers, and the U.S.A. should be very glad that such an important spiritual leader choose the U.S.A. as his living country. So, I hope your government will

change its decision as soon as possible.

thanks for your attention and many greetings
