To whom it may concern.

For 20 years I have been working as a graduated social-worker in social affairs.

I come to know Bhagwan's teaching by reading books and listening to tapes. I get a personal contact to Bhagwan in Oregon.

I can confirm that the content of my social work was changed by this time. It is not also limited to methodic work but has other dimensions.

It is possible with Bhagwan's influence and because of his teaching to give more experience to the clients and to lead them out of personal closeness into another wider reality without tension, with more tranquility.
