To Whom It May Concern,

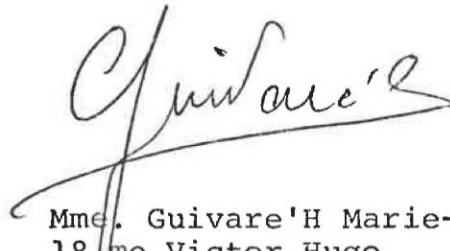

I became acquainted with Bhagwan Shree Rajneesh in July 1982, when I met one of his disciples. His joy in life, the ease around him, the simplicity and love touched me to my very heart.

I'm a medical doctor and I practice my profession in several major pediatric centers in France. I obtained my M.A. in 1979 from Renee Descartes University in Paris, and a diploma in preventive pediatric science after 11 years of studies.

I got in contact with Bhagwan through several of his religious books, collections of discourses given in Poona. They answered so many questions that I had asked myself concerning the relationship between doctor and patient, the increase of my sensibility and the totality with which I applied myself to my profession. The way I used to practice my profession has changed as well as my personal life. My relations with others, my friends, my husband, and children evolved in a positive way.

Bhagwan, with disciples all over the world, is a man of immense culture and high spirituality - a profound philosopher, a great spiritual master. He has helped me increase the quality of my relationships with others by becoming more acquainted with myself. This is indispensable in the practice of my profession.

I wish, from the depths of my heart, that the whole world would recognize the incredible value and outstanding significance of Bhagwan Shree Rajneesh.
