To whom it may concern,

after having accomplished my medical studies I have been working in the field of psychiatry and child psychiatry for almost 10 years. At the moment I am head-physician at the Centre Médico Psychologique in Delémont which takes care of the child psychiatric problems in the Jura (a department of Switzerland). I have got to know the ideas of Bhagwan Shree Rajneesh during the last years by reading some of his books and listening to his tapes, talking to many Sannyasins and experiencing Bhagwans meditations. Without being a Sannyasin myself I must confess that I adore Bhagwan's ideas as an excellent synthesis of western and eastern philosophies and religions. I appreciate especially his combining meditation and western psychotherapy methods. I think he is one of the wisest men nowadays and I hope The United States will care well for such a special personality.

Yours sincerely

R. Matter
