

IB PLANCH LARSEN
HOLSTEBRO

17. July 1983.

TO WHOM IT MAY CONCERN

Having come to know Bhagwan Shree Rajneesh through my daughter, through the Rajneesh Meditations Center in Copenhagen and through his books and speeches I must say, that I look upon him and his work as a very important and positive part of the ideologic supply, which is accesible for the youth to day.

In America as well as here in Europe we have the last 20 years seen some very powerful attitudes among young people. These attitudes are on the whole running two ways: one negative and violent and one positive, accepting and peaceable. I have always seen the youth of Bhagwan as the latter and I find it very wise and foresighted - especially in the free part of the world - that we support a work like that of Bhagwan.

Teaching and organizing music and other bran-

ches of art I have become a great inspiration and better understanding of many subjects from his texts, and his interpretation of art and creativity has highly enriched my own work within these subjects.

It is therefore very easy to me to express my appeal to support of the exceptional ability of Bhagwan Shree Rajneesh.
