To whom it may concern:

Re: Bhagwan Shree Rajneesh.

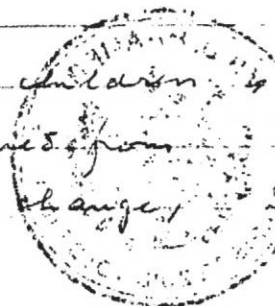

The undersigned wishes to express herewith how important it is in her opinion that Bhagwan Shree Rajneesh should be permitted resident status in the United States of America.

To explain this wish, the following may serve. Undersigned was born in 1915 in the Netherlands.

She studied Germanistic languages and for 25 years she taught English and German at a grammar school in Haarlem, Netherlands.

She had no religious upbringing and had practically no contact with religion during the first and greater part of her life.

She married early in life and had five children. When her children were adults, she resigned from work, because she felt the need for a change.

a transformation of her life. The need for spirituality, for religion became urgent.

When her eldest son had become one of Bhagwan's disciples, she started reading his books, then went to Poona twice and knew that he was one of the greatest living masters.

She is of opinion that after hearing or reading his lecture every intelligent man or woman must see that Bhagwan Shree Rajneesh is a great religious master, by whom great groups of people, very often people of high intellectual standing, are influenced all over the world.

Through him great masters like Jesus and Buddha come to word in his books and give their message of love to many thousands of people. Like Socrates he tells them to penetrate to their own deepest core, thereby becoming a light unto themselves and to others.

For this world so divided, so full of violence and hatred such messages are immensely important. For a master to be able to bring such messages, safe and unprejudiced surroundings are necessary, a country is necessary like the United States of America, whose name stands for freedom and hospitality. From the U.S.A. this message may spread all over the world to the benefit of all people.
