Hamburg, 18.7.1983

To whom it may concern ...

I am a judge at the Family-Court in Hamburg, West-Germany. I am very much concerned about the decision that will be made by the INS about the staying of Baghwan Shree Rajneesh in America.

My life, watched from the outside was absolutely successfull. I gained everything I could imagine in the outside world: Money, prestige, power, a beautyfull family. And still there was something missing, which I did not know. In 1981 I met Baghwan Shree Rajneesh and became His disciple. He showed me what was missing: A dimension of inside, religiousness, love. He gave me and He still is giving me more and more of an understanding of what life is all about.

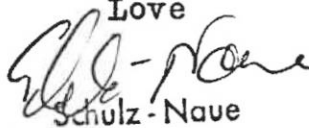

I was born in 1942, went to school, took all degrees, went to university and studied law. I finished with a good examen. I started as public prosecuter, hold this profession for six years ans I am now since six years a judge at the Family-Court in Hamburg. I was married with two children had a house and garden.

The first time I reallized, that I was only living in the outside world and this was based on sand was, when I became aware, that my marriage was finished. I was in a mess. But at the same time I became open to that, what Baghwan offers to every human being who has the guts of really listening to an enlightened master.

Baghwan Shree Rajneesh is known all over the world as a man of extraordinary abilities. He spoke to people for more than twenty years, sharing His inside and wisdom on religion, relationship, politics, money, everything that matters today and gave and is still giving great inside of what life is all about. His words are published and spread all over the world. Many people are still coming to become His disciples. There are now more than 250 000 sanyasins all over the world.

Since I became a sannyasin my life changed completely. I am still a judge. But the quality of my doings change. I am becoming more loving, more understanding, more compassionate. I gain more and more courage to understand and accept the people who come to me with their problems. Everybody who has to make decisions on people's problems knows, how difficult it is to really listen to people and not only deal with a case on a formally correct level. It needs courage and love.

America has the great chance to help this beautiful man to stay in the country and do His work. Everybody is talking about humanitarian work which today^{is} more needed in this world than ever. Baghwan is not only talking about it. He does it. Please help Him to stay.

Love
