Zurich, July 5 th 1983

To whom it may concern .

As a psychiatrist I confirm, that I know several persons , whose problems have been happily solved through life in Bhagwan's community.

I am impressed to see their feelings unfolded and freed from all sorts of disturbance and suffering that their previous life had done to them .

They enjoy their living together in a non-egoistic way and work enthusiastically for a positive future .

I think it is a blessing for many to have met Bhagwan and experience a way of life based on love and understanding .

In this sense I strongly wish that Bhagwan's influence may continue to be successful and to develop.

Sincerely Yours
