

Hamburg, Juli 19, 1983

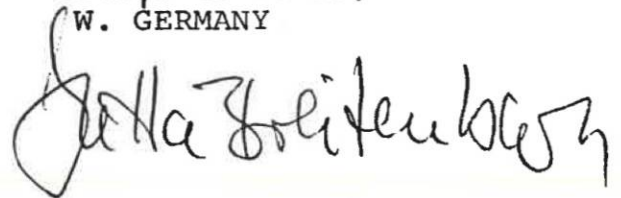

TO WHOM IT MAY CONCERN

I declare that Bhagwan Shree Rajneesh is immensely important for me in my work.

I became acquainted with Him in 1976 when I started to read some of His books. I was very impressed by His exceptional abilities and His wide knowledge. In 1981 I started practicing His meditations and in 1983, June, I saw Him for the first time personally in Rajneeshpuram, Oregon. I was deeply touched. I felt that I had made contact with a man who was much more than a good author with a wide range of knowledge in sciences and arts. Bhagwan is a man of wisdom and a great religious leader. He opened my heart, my soul - silently! It was a silent communion from heart to heart. Since I connected with Bhagwan I feel more relaxed and more creative.

I started at the University of Hamburg and have a degree in Mathematical Linguistics and Political Science. For several years I was a leader of many group-dynamic workshops in the Georg-August Universität, Göttingen. Since six years I am reporter of "Bild"-Zeitung, Europe's biggest newspaper, (daily circulation 6.5 mill.). Last year I worked in Istanbul, Turkey, helping to develop a new Turkish newspaper: "Güneş", (daily circulation 600,000). Presently I write for the Seewald/Molden Verlag, a book about PSI: how to develop the human abilities of telepathie, clairvoyance, telekinese, healing etc. Especially for this task I receive great inspiration from Bhagwan Shree Rajneesh. He is a great teacher. By His many books He influences all aspects of the sciences and arts and more and more people are being transformed by His love and wisdom.
