TECHNOLOGICAL ACHIEVEMENT
1976 1980

ROTHAMSTED EXPERIMENTAL STATION

Harpden, Herts. AL5 2JQ
Telephone: 058 27 63133

July 20 th 1983

To whom it may concern,

I am a chemist, having graduated from Oxford University with an honours degree in 1978. I have worked for Shell Biosciences Laboratory and am currently working for the British Agricultural Research Council developing new methods of crop protection.

I became acquainted with Bhagwan Shree Rajneesh and his work through a fellow Oxford graduate who had been in Poona at the Rajneesh Ashram. I have been following the meditation techniques and group therapies of Bhagwan and have visited Rajneeshpuram, Oregon. There I found the city's achievements of reclaiming the land for agricultural purposes most highly commendable.

Bhagwan Shree Rajneesh, as the inspiration behind this work, is in my opinion a man of exceptional ability and insight.

Yours faithfully,

Paul Hulme
