

TO WHOM IT MAY CONCERN

I, the undersigned, am Frederika R. Schreutelkamp. By profession I am a biologist. I was born October 23, 1944 in Amsterdam, Holland, and have the Dutch nationality.

I studied at the universities of Amsterdam and Brussels and received a Masters Degree in Natural Sciences. For six years I have been working at the Free University of Brussels as a research associate in genetics and molecular biology.

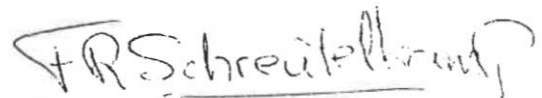

I have always had a deep interest in physics, cosmology and ecology, and from 1976 on I have been actively involved in the environmental movement in Holland.

In 1980 I came in contact with Bhagwan Shree Rajneesh through a friend. I was seized immediately by the incredible understanding of natural sciences He gave proof of. For me, His understanding went beyond that which I had learned at universities, and my personal experience was as if pieces of a jigsaw-puzzle suddenly fell together.

In 1981 I became a disciple of Bhagwan Shree Rajneesh, which has been highly important for my personal life. I feel that Bhagwan is an exceptional religious leader.

I have visited Rajneeshpuram - the headquarters of Rajneeshee religion - and have experienced this community as most advanced, considering the up-to-date technology used and the extent to which people are living together in harmony with each other and with nature.
