DR. M. HAYDN A-3910 ZWETTL,

To whom it may concern

I was borne in Vienna at the 9<sup>th</sup>Oct.1942, where I also attended primary and grammar school. 1960 I started my studies at the medical faculty of the university of Vienr 1967 I took the doctors dergree of medicine. Immediately I became an assistant at the "I.Universitäts-Augenklinik" of the Viennese university. I remained there till 1972, when I had to absolve my compulsery military service. 1973 I moved to Zw a small town 120 km NW from Vienna, where I first completed my medical education as an oculist and opened then an ophthalmological practice. The district of Zwettl has about 50.000 inhabitants. To provide a proper ophthalmological care for all this people (I am the only oculist here) I started a new, greater and better equipped practice in the centre of Zwettl 1 1/2 years ago.

My first contact to Bhagwan was a sannyasin I met in a humanistic pychological centre in Germany. There I read the first lectures and did the first meditations he created. What he said, impressed me from the first moment. So a great inquisitivnes arose in me. As result I travelled to Poona 1979 to see Bhagwan. I took spontaniou sannyas, lived in the ashram, did some groups and meditations.

It's difficult to describe what happend there. Something new opened to me, it came some new quality in my life.

Back to Europe I continued meditation, visited different european centres, did other groups, till my second visit to Poona 1980.

At this time I planed to go definitly to Poona. One year later Bhawan leaved Poona and I decided to stay in Zwettl and to do my work here.

Bhagwan continues now his work in Oregon. It would be of great importance to give him the opportunity to do it further on. His work is meaningful for so many people, may be for the whole world. He lets disappear all dualities between the religions, between different peopole, within everybody of us.

In that way also illusion disappears, what is mostly painful and causes difficultie for the other. You can see in Rajneeshpuram the result of the work. The commune is growing and growing. And all projects prosper.

I hope that in see Bhagwan next year in Rajneeshpuram, till the time my practice will be settled, so I can visit America.

Please donf destroy the blooming commune by sending Bhagwan away.

Dr.Manfred Haydn
