TO WHOM IT MAY CONCERN

I am writing in support of Bhagwan Shree Rajneesh and his petition to remain in the United States.

Bhagwan Shree Rajneesh is a person of exceptional qualities and his teachings have helped many in the fields of Arts and Sciences. His work has always emphasized the individual and trusting one's own creative and intuitive abilities. He has developed techniques whereby one can see the fears and limiting beliefs about oneself, others and the environment and has devised methods to overcome them, thus freeing the individual to attain to his/her fullest potential as a human being.

All recognized persons in these fields have been individualists, relying on and trusting their own spirit and creative energies. Bhagwan Shree Rajneesh is one such rare individual who contributes much to society by sharing his understandings and insights into the very nature of spirit and matter and through the individuals he has helped to realize their own potential.

I would hope that he will be recognized as the asset to humanity and the human spirit that he is and allowed to stay.

Sincerely,

Diana Ziegler
