About Bhagwan Shree Rajneesh, Oregon

In 1979 I went to Bhagwan Shree Rajneesh' Ashram and University, Poona, India for 3 month. I went there to participate in his educational program designed for professionals and students in the fields of psychiatry, psychology, anthropology, religion, and philosophy.

Every day Bhagwan taught people in exploring theoretically and practically the great spiritual traditions of the East (Zen Buddhism, tantric science, art and ritual, sufism etc.) and their relationship to Western science.

Special attention Bhagwan shree Rajneesh has paid - in his discourse - similarities and differences between mysticism and psychosis and to the problems related to evolution of consciousness. This has been very useful for me in my work with psychotic people.

Bhagwan Shree Rajneesh is a Great Spiritual Master of the East who give new frontiers of Western Science.
He is a researcher who has contributed to the emerging paradigm and revolutionary developments in quantum-relativistic physics, brain research and modern consciousness studies which point to a future synthesis of science and mysticism.

Yours sincerely

Elin Hansen
