

To whom it may concern.

I'm a disciple of Bhagwan Shree Rajneesh since the end of the year 1981 and when I took sanyas he was in India and was already silent. But his message, the connection between us was really clear, without words he taught me a lot. Then he moved in America, I was so happy to know that my master was not far anymore from Canada, the connection became stronger because of his powerful energy because he was physically closer to me and to feel him even closer I went to see him in Rajneeshpuram at the first Annual World Celebration in 1982. What a great experience to sit at his feet during satsangs and darshan, he blew my mind one hour a day for 5 days. Now because he is in U.S.A. I can see him many times every year.

His silence is so full of love, of life, he makes me really happy and more aware every time I sit with him. No need to talk anymore, he already said what he had to say in the past and many many books have been written about his teaching. Now it is a new stage in our religion, the stage of the silent heart to heart communion. His silence makes me silent inside, peaceful and loving. His silence fills me with joy and happiness. Bhagwan is an extraordinary man, he is so pure, so divine! He is my religious leader and I'm so glad he is in America. More than 10,000 people come to see him every year, he is so powerful, he spread his love all over us as we celebrate and fill up our hearts to share it after with our friend family and at work. Since I'm his disciple I'm more careful, more loving with everybody, I'm becoming more and more helpful for the society.

Before to become a Rajneeshian I was ...
and I couldn't find any religion where real love, happiness and
honesty was really part of the disciple's being. But now, Bhagwan
religion is all that and more, the disciples are really loving people,
happy and sincere. I simply felt immediately in deep love with
Bhagwan and his disciples at the very first contact with them.

We are one in Bhagwan's energy, his silent teaching is the
most complete religion in the world!

I hope you can feel how much I love him, how
much I want him to stay in U.S.A. and you will recognize
him as a religion leader because he is the greatest anyway!
His love, his presence in U.S.A. is grateful for every Americans
even economically! the U.S.A. need a man like the enlightened
one, Bhagwan Shree Rajneesh!

Sincerely yours,

Love,

Ma Prem Sargaji
