To whom it may concern.

In my profession, as director of the surgical Department of a Regional Hospital in Italy for about 40 years, I had the chance to come across the work of Bhagwan Shree Rajneesh, to read some of his books and to visit the main of his communities in Italy. Even if I am not myself a disciple of this Spiritual Master, this meeting was very important for my life and my profession, because it helped me to integrate the technical side of my work with the psychological, and specially in the delicate task to help people who have to face death and some very serious or fatal diseases.

Hearing that is going to be decided about his staying in the U.S.A., I would like to express my hope that He can find hospitality and support for his work in your Country.

Francesco Faccioli

A handwritten signature in dark ink, appearing to read 'F. Faccioli', written in a cursive style. The signature is positioned below the printed name.

Bolzano, July 30, 1983
