

To Whom It May Concern,

P.O. Box 55
Antelope, Ok. 97001

I am a year & a half resident of Antelope - working at the ranch - and disciple of Bhagwan. Since my arrival I've watched this overgrazed land turn into an oasis with the guidance of a spiritual master who has exceptional qualities and abilities. Without his spiritual inspiration and presence I feel this dream of our Commune would not be possible.

My relationship with Bhagwan can best be described as a heart to heart communication - it stems through love and comes from the heart. It is beyond words and is only possible through a master, a teacher, who has exceptional qualities and is willing to share his abilities with mankind.

I choose to be with him as his physical presence is necessary for my own spiritual growth and I am reminded of this everyday as I greet him on his daily drive. My quality of life has changed dramatically since I became a disciple.

Before I lived and worked in a world without love. Love is a key word when I compare my old work with my worship on the ranch. Before my work was goal orientated and very competitive. I worked as a freelance scenic artist in community theatre without any professional training or degrees. Since I had no degrees and wanted to "make it" as an artist I had to be very aggressive to survive and did it totally on my own. Now with Bhagwan's teachings I approach worship with creativity, love, and laughter. On the ranch my worship is surveying and I work with a team within a commune of support and love.

We are creating an alternative life style that is life affirmative guided by Bhagwan's teachings. The emphasis for me is love and is most possible with his physical presence. His dream of a commune created out of a desert is also my dream and can only benefit all of mankind. Change such as this only happens through the

guidance of a spiritual teacher with
exceptional abilities and qualities
such as Bhagwans.

Sincerely

Ma Vast Prasad
