To whom it may concern

I've got a master degree in education on the University Bielefeld.

For four years I did dancing-classes and workshops for children and adults.

Three years ago I read a book from Bhagwan Shree Rajneesh and got the feeling 'That's it'. He is expressing what I had no words for. My growing interest in his teaching made me take part in different groups and meditations.

For more than a year I did a training in message with disciples of Bhagwan Shree Rajneesh. Last year I came to Rajneeshpuram for the first time just to see how his community is realizing Bhagwan's vision of a new man. I became so impressed by the love and flowering that I returned to this year's festival and stayed for a longer period. I feel Bhagwan's presence even stronger since he is in silence.

Exactly this has a special influence on my work. Being centered in myself I can meet

my pupils from my heart without words.
So my whole world changed due to Bhagwan.
I feel that I'm on the right way because
my groups become more intense. More and
more people come and they like it, too.

As far as I can see the same is true for
all the other people influenced by
Bhagwan Shree Rajmush and I hope, he
can continue his silent and important
work.
