TO WHOM IT MAY CONCERN:

Bhagwan Shree Rajneesh is a very well known figure in modern psychology and philosophy. During the past 5 - 10 years several well known and respected professionals who studied with Rajneesh in India introduced his work and his ideas into our western culture.

Specially here in Germany this had a significant impact in the field of Humanistic Psychology. This means for example that today about 90% of the professional psychotherapists in Germany have heard about him and his ideas! And maybe 20 - 30 % of them are consciously using some ideas or methods from him in their work.

His disciples - all dressed in red clothes - are seen in every German city. Most of them are very intelligent and well educated people. They seem to live up to his ideas regarding "to live life and enjoy it to the fullest" and "to put your heart into whatever you are doing" and this makes them pretty successful people - most of them work now in high paid and respected jobs.

If you want to make yourself a picture of Rajneesh's work I recommend to read any of his books. They are very well distributed and you can find in every bookstore that offers books on esoteric sciences, humanistic philosophy or modern psychotherapy several books from or about Rajneesh!

Sincerely

Robert Schleip
