

Autogenics & Hypnotherapy,
57 Church Street,
Inverness,
SCOTLAND

17th July '83

To whom it may concern :-

I am a graduate of Cambridge University, a qualified medical practitioner and work full-time as a hypnotherapist. I have a specialised interest in the modern developments of hypnosis - Autogenic Training and Neuro-Linguistic Programming.

In 1980 I had the pleasure of visiting the ashram of Bhagwan Shree Rajneesh at Poona in India, and heard him speak. Since then I have read a number of his books. He is a remarkable philosopher of human enlightenment and a great spiritual teacher. He is directly responsible for many progressive developments in our understanding of consciousness and personality growth, and in particular I have gained valuable learnings and insight from contact with the type of hypnotherapy which his followers practise, De-hypnotherapy.

I spent three happy years of my childhood living in the United States of America, and I envy that nation her luck at having such a remarkable man residing within her borders. We could do with him over here in Scotland.

Yours sincerely

Peter Carr

Dr. Peter Carr M.A. M.B.B.S.
