

ULLERÅKERS SJUKHUS

Uppsala 15/7-83

Ymergatan 14 75325 Uppsala

To whom it may concern

I am a medical doctor , MD, from Sweden. I am assist^{nt} chef of a dayward department of Ulleråkers sjukhus Uppsala Sweden. We work there with groups in various forms: talking groups, psykodrama groups, artterapi groups, and more groups. My license is for adult and child and youth psychiatry. I Have earlier been head of a child and youth care center in Stockholm for 3 years, and assistent chef in a hospital for child and youth in Ulleråkers sjukhus Uppsala before that.

In my daily work as a psykiatrisk Bagwan has been a very important teacher for me. Both in my work with individual s and groups. Especially in all those patients with existenti^l problems has his teachings been of special importans .

In the individual groups his meditations has made itt possible for me and others to experience the growth process , and to do it under a short period , seen relatively.

More than that has the group process been understandable under his guidance. He has around himself a staff of psykoterapeuts all of eit witch he has educated in group terapy among other tings. These terapist^s are the best group terapist^s in the world. His education is so outstanding that I already met many terapist^s who are planning to stay one or more years with him to learn therapy. I am even planning to do so.

But Bagwans most important work is about the extensi^l problematic of life. He is here , as I see it, one of our times g^{at}est teachers. He is in the real meaning a great religios teacher and spiritual leader. He has for us explained the teachings of the old religios leaders and masters. To that has he given his own explanations . It has been possible for me to meet people with religios pl^oblematic and help them, thanks to Bagvan.

I Have learnt to know Bagwan by meditations, tapes , videos and at last by wisiting him . I have done three groups with some of his best groupleders.

In the therapies he has mixed western new therapies with old eastern knowledge together with both old eastern meditations and meditations of his own. Around himself has he gathered the best of the therapists of the world. He is guiding them all to do more than they earlier have done.

It is possible for people to be helped from their neurotic problems in a much cheaper way through his therapies than others. And I am convinced that if we search new ways of therapy or will do research in therapy we will have the best guidance by Bagwan.
