West Germany

I am a 22 year old disciple of Bhagwan Shree Rajneesh. I had started my religious journey in 1976 when I met an Indian chemist who taught me Raja - and Hatha Yoga. We continued for two years - I practised my meditation techniques daily - I finished high school and became a farmer. Meanwhile my older brother had gone to India to find a teacher and ended up in Poona. He rang me up and suggested that I should visit him there.

I went to Poona in April 1979 and became a disciple of Bhagwan Shree Rajneesh. I worked in the farming department of the ashram and learned how to combine day to day activities with the art of meditation. After a while positivity had taken over and I was happy being.

Farming in Poona and even more now, in Rajneeshpuram, is totally different from farming anywhere else. Bhagwan's vision of men living in harmony with each other and with nature has become reality. This is possible just because of Him.

Three weeks ago we were sitting with Bhagwan in Satsang which means heart to heart communion. Communion can only happen in Silence. Silence is now His way of teaching and He is helping hundreds of thousands of people to become happy - to become themselves. He is showering bliss. He is showering love....

This man is such a gift for humanity - not only to His disciples - but to everyone and it's about time this fact is recognized.

Sincerely yours

Swami Prasad Prjawa
