

To whom it may concern,

The first time I met Bhagwan Shree Rajneesh, it was thru a picture on the wall. He attracted me immediately, there was something very special for me with this man. The incredible grace and love which shined out of his eyes touched me deeply.

Later I heard his name was Bhagwan Shree Rajneesh, an Enlightened master who lived in Poona with his disciples.

From this time on I read all of his books I could get.

I took all of his words deep inside because what he was speaking about was a sort of recognizing where I was seeking for a long time.

I felt deep inside, there must be more in this life I'm living; there must be another higher way.

For me life became more and more empty and useless, and I became more and more hopeless about myself and life and then there was Bhagwan Shree Rajneesh with his deep deep love and understanding and he explained me that his books are

lectures, where this feelings came from,
what this inner emptiness means.
Men is always seeking outside he said,
always looking for satisfaction for all
his desires in the outside material world.
He showed me to go inside for a
self-discovering - traveling thru meditation.
He learned me self-acceptation and to
love myself and thru this way
I started also to love others and my
surrounding more and more.

There was growing a tremendous love and
gracefulness for this master, my master.
I felt this is the man I love and want
eternal and this is the man who can
help me to become really human.

I became one of his sannyasins, without
ever seeing him in August 1981.

From this time on I started growing,
I became more and more open and loving
and I was and am gracefull for every
new day with my master Bhagwan Shree
Kripneesh living in my heart.

with love

Ma Antan Shakri
