

Ullowo 29 July - 8

To Whom it may concern

I have been a samyasin for some years now. I took samyas in Iowa where I lived and worked for almost two years. Meeting Bhogwan and living in his commune had been the most important and deep experience of all my life. Bhogwan and his environment has helped me a lot to see and understand myself. For him I experienced a field of energy or, if you prefer, an atmosphere of love and care unique, in which I could grow because more at ease and at ease with myself.

When I came back home I realized that the process of inner growth triggered by Bhogwan was not stopped by my being so far away. The vitality that I put into my work, (I am an interior decorator) - into meditative ~~inactivity~~ connects me with ^{him} immediately: a deep silent connection.

There is no need of words. Just sitting at Satsang in his presence at Roquebroum I had such deep insight of myself, and he did nothing just sat there !!

Things are happening now - ^{and him} not only inside

Just look the way and speed in which Rajasthan
is growing. A desert turning slowly into a garden.
New roads new buildings schools lakes gardens etc. &
everything in total respect of nature and the people
here is working in an atmosphere of joy.

I do think that Rajasthan is just the flower
of the love Bhagwan is pouring into his samyogi.

With love
